Professional Summary

Machine Learning Engineer experienced in NLP, predictive analytics, and deploying ML models into production environments. Skilled in Python, TensorFlow, PyTorch, and MLOps practices.

Technical Skills

Python, TensorFlow, PyTorch, NLP, MLflow

Professional Experience

Machine Learning Engineer — Tech Company (2022–Present)

- Developed and maintained production-grade software systems.
- Collaborated with cross-functional engineering teams.
- Improved system performance, reliability, and scalability.
- Participated in code reviews and agile ceremonies.

Previous Experience

Software Engineer — Digital Solutions (2020–2022)

- Implemented new features and optimized existing systems.
- Worked closely with QA and DevOps teams.

Education

B.Sc. Computer Science / Software Engineering

Projects

Worked on enterprise software projects involving cloud infrastructure, scalable APIs, testing automation, monitoring systems, and modern software architectures.
